SARAH AHMED MONAZEE

Frontend Web Developer

saaraa2333@gmail.com | +201211495945 | LinkedIn | GitHub| Portfolio| Maadi, Egypt

Summary

I am a dedicated Frontend Web Developer specializing in Angular,React and modern web technologies. Skilled in building responsive, user-friendly interfaces, I focus on delivering high-quality applications with seamless performance across devices. Experienced in integrating RESTful APIs and collaborating within cross-functional teams to create engaging and visually consistent user experiences.

Experience

Elevate Academy

Frontend Developer (Angular) 9/2025– 3/2026

Hybrid, Egypt

- Developed scalable Angular applications following Clean Architecture and **SOLID** principles.
- Implemented advanced state management using **NgRx** and Angular **Signals**.
- Collaborated within an **Agile/Scrum environment**, using **GitHub** for version control and **Jira** for task management.
- Developed and executed **unit tests**, ensuring high code quality and application reliability.
- Develope Worked on **micro-frontend architecture using Nx**, contributing to modular and scalable application structure.

Renile

Frontend Developer (Angular, React) 5/2025- 8/2025

Onsite, Intern

- Developed a **responsive HR management system** using Angular, improving employee data handling and user experience.
- Built **reusable and dynamic components** following component-based architecture, enhancing scalability and maintainability.
- Collaborated closely with backend developers to ensure **seamless integration** of HR modules such as employee management and requests.

Zaki Platform

Online Programming Instructor 01/2024- 09/2026

Remote platform providing online education

- Taught programming fundamentals and visual coding to children
- Designed engaging lessons using platforms like python and beginner-friendly JavaScript tools
- Helped students develop logical thinking and problem-solving skills

Skills

Angular · TypeScript · JavaScript (ES6+) · HTML5 · CSS3 / SCSS · Bootstrap · Tailwind CSS · Responsive Web Design · RESTful APIs Integration · RxJS & Observables · Angular Material / Nebular · Git & GitHub · Figma (UI/UX Prototyping) · JSON & HTTP Requests · SPA (Single Page Applications) Concepts · Nx(Microfrontend)

Certification

Full Stack Development (Angular & .NETCore)– Route

Frontend Development with React – AMIT

Competitive Problem Solving – ICPC 2023

Projects

Fitness App – Angular Nx Application

GitHub | Live Demo 06/2026 - 08/2026

Modern fitness web application built using Angular and Nx Monorepo architecture.

- Developed a modular fitness platform using Angular and Nx for better scalability and code organization
- Built reusable components and structured features using a modular architecture
- Integrated REST APIs for dynamic data handling and application functionality

Roze App – Micro Frontend Platform

GitHub | Live Demo 06/2025 - 08/2025

Full-stack web application built using a modern micro frontend architecture for scalable role-based systems (Admin & User dashboards).

- Developed a modular enterprise-style platform using **Nx Microfrontend architecture** for better scalability and code separation
- Ensured scalable communication between microfrontends using structured state sharing and API
- Implemented authentication and authorization using **JWT-based security system** with role management

Place Recommendation System– Full Stack Web App

GitHub 07/2024 - 06/2025

Full Stack web application that leverages machine learning for personalized recommendations

- Developed a smart full-stack platform that recommends places based on user preferences
- Integrated an ML-driven recommendation engine using Scikit-learn
- Created an Admin panel for managing users, offers, reviews, and reports

E-Commerce Web App

GitHub | Live Demo 2025 - Present

Full-stack e-commerce web application that allows users to browse products, manage cart, and complete orders with a simple and clean user experience.

- Developed a responsive e-commerce platform for displaying products, categories, and product details.
- Designed a clean and user-friendly UI with focus on performance and usability.
- Ensured smooth state management and reusable components for maintainability

Education

Helwan University – Faculty of Computers and Artificial Intelligence

Egypt

Bachelor's in Computer Science 09/2021 - 06/2025

Languages

Arabic Native

English Advanced
